

SECURITY ASSESSMENT REPORT

Authorized Security Report

Prepared for the authorized owner of

example-customer.com

OVERALL RISK SCORE

6 /100

Safe, authorized simulation results

RISK LEVEL

Low

PACKAGE

Web Quality

STATUS

Completed

FINDINGS

2

SCAN DATE

01 Aug 2026

REPORT TYPE

Client Evidence

Confidential security evidence

This report is intended for authorized stakeholders and contains safe passive assessment results.

Generated by BreakMesh

Appendix A — Scope & Methodology	8
Appendix B — Check Register	9

Executive Summary

This report summarises the findings from an automated security simulation performed by BreakMesh against <https://example-customer.com>. All checks are passive and safe-simulated — no destructive payloads are used. Overall result: grade **C** with a risk score of **6/100** and **Low** risk.

RISK SCORE	GRADE	RISK LEVEL	TOTAL FINDINGS
6/100	C	Low	2

SEVERITY	FINDINGS	RECOMMENDED ACTION
LOW	2	Schedule remediation in backlog

Executive Actions

What passed: **0** checks completed without findings. What needs action: **2** checks produced findings for review.

Checks Performed

The **Web Quality** package included **2** checks in scope. **0** completed without producing findings. Effectively tested 0 of 2 checks.

CHECK OUTCOME	COUNT	CHECKS
Passed	0	- No passing checks recorded
Needs review	2	- Accessibility Evidence Snapshot - SEO and Social Metadata Evidence

Scope & Confidence

Breakmesh is a continuous safeguard, not a guarantee of safety. This scan identifies and prioritises common, detectable weaknesses so they can be fixed before an attacker finds them — it reduces risk but cannot prove the absence of every vulnerability. No scanner can. Absence of findings means the checks that ran did not surface an issue, not that the target is immune to attack. Use these results as one layer of a defense-in-depth programme alongside secure development, timely patching, monitoring, and periodic human-led penetration testing.

SOC 2 Evidence Mapping

This mapping shows which SOC 2 trust service themes the completed checks can support as audit evidence.

SOC 2 THEME	MAPPED CHECKS	FINDINGS
Privacy	1	1
Processing Integrity	2	2

PCI-DSS v4.0 Control Mapping

This mapping shows which PCI-DSS v4.0 controls the completed checks can support as audit evidence.

CONTROL	MAPPED CHECKS	FINDINGS
1.2.1	8	
1.3.1	10	
11.3.1	21	
4.2.1	7	
6.2.4	49	
6.3.1	4	
6.4.1	7	
7.2.1	29	
8.3.1	19	

ISO/IEC 27001:2022 Control Mapping

This mapping shows which ISO/IEC 27001:2022 controls the completed checks can support as audit evidence.

CONTROL	MAPPED CHECKS	FINDINGS
A.5.18	10	
A.5.24	3	
A.5.34	3	
A.8.14	7	
A.8.20	8	
A.8.24	7	
A.8.26	12	
A.8.28	31	
A.8.3	19	
A.8.5	19	
A.8.8	4	
A.8.9	26	

HIPAA Security Rule Control Mapping

This mapping shows which HIPAA Security Rule controls the completed checks can support as audit evidence.

CONTROL	MAPPED CHECKS	FINDINGS
164.308(a)(1)	4	
164.308(a)(6)	3	
164.308(a)(7)	7	
164.312(a)(1)	37	
164.312(c)(1)	37	
164.312(d)	19	
164.312(e)(1)	22	
164.502	3	

DPDP Act 2023 (India) Control Mapping

This mapping shows which DPDP Act 2023 (India) controls the completed checks can support as audit evidence.

CONTROL	MAPPED CHECKS	FINDINGS
Rule 6(a)	33	
Rule 6(b)	19	
Rule 6(d)	4	
Sec 11-14	3	
Sec 6	3	
Sec 8(4)	3	
Sec 8(5)	88	
Sec 8(6)	3	

Severity Distribution

Master Findings Table

Every finding in this report, worst first. Each is written up in full under Detailed Findings, and can be referred to by the ID shown here.

ID	FINDING	SEVERITY
	Images Missing Alt Text	LOW
	Missing Open Graph Metadata	LOW

Detailed Findings

Images Missing Alt Text

LOW

4 of 12 images on the homepage are missing descriptive alt text for screen readers.

AFFECTED URL	https://example-customer.com/
CONFIDENCE	High
VERIFICATION	Indicative
REVIEW	Legacy verification requires review
COMPLIANCE IMPACT	SOC 2: Privacy, Processing Integrity
REMEDIATION	Add descriptive alt attributes to all meaningful images; use empty alt="" for purely decorative images.
EVIDENCE	observed: 4 of 12 images on the homepage are missing descriptive alt text for screen readers.

Missing Open Graph Metadata

LOW

The homepage has no Open Graph tags, so shared links render without a preview image or description on social platforms.

AFFECTED URL	https://example-customer.com/
CONFIDENCE	High
VERIFICATION	Indicative
REVIEW	Legacy verification requires review
COMPLIANCE IMPACT	SOC 2: Processing Integrity
REMEDIATION	Add og:title, og:description, and og:image meta tags to key pages.
EVIDENCE	observed: The homepage has no Open Graph tags, so shared links render without a preview image or description on social platforms.

Appendix A — Scope & Methodology

This assessment combines automated checks from the BreakMesh catalogue with the industry methodologies below. Checks are mapped onto these standards; the standards are not run in place of them.

METHODOLOGY	APPLIED AS
OWASP Testing Guide v4.2	The web application testing methodology our check catalogue is structured against.
OWASP ASVS	Application Security Verification Standard - the control set our packages map to.
OWASP API Security Top 10	Used for the API Security package, including BOLA/BFLA and mass assignment.
PTES	Penetration Testing Execution Standard - the engagement structure for Active Pentest.
NIST SP 800-115	Technical Guide to Information Security Testing and Assessment.
BreakMesh safe-simulation model	Passive checks observe only. Active probes are consent-gated, scope-locked, request-budgeted and never carry a destructive payload.
Race conditions / TOCTOU	Business-logic race conditions are assessed during human-led Active Pentest engagements, not automated scanning: confirming one means causing it, and it needs knowledge of the specific application flow.

On proof of exploitation: this report records the request and response that demonstrate each finding. It deliberately does not include runnable exploit code. A security report is forwarded widely, and a working attack script reaches everyone it is forwarded to.

Tests that can change data: not allowed for this scan, which is the default. Every check here observed only, or sent crafted requests that change nothing. Checks that can find a problem only by causing it were skipped and are marked as not run in the Check Register.

Appendix B — Check Register

Every check in this package and what it produced, including those that ran and found nothing. The summary earlier in this report gives counts; this is the evidence behind them, so a question of the form "was X tested?" can be answered directly.

CHECK	OUTCOME	DETAIL
